

équiterre

Change the world, one step at a time

ANNUAL
REPORT
2016

Sidney Ribaux

Executive Director

Message from the **Executive Director** **2016 a year of victories**

In January, following a lawsuit filed by Équiterre and its partners, the federal government was forced to review 350 pesticides that are banned in Europe but still used legally in Canada. This major victory brings us an important step closer to our ultimate goal of banning all the most dangerous pesticides.

In another huge legal victory in 2016, Équiterre and its partners forced a recalcitrant TransCanada to submit its Energy East pipeline project to Quebec's environmental protection legislation. The environmental review of this project should take place in 2017 and Équiterre intends to play an active part in the process.

Équiterre was also able to count on the strength of our citizens' movement to convince the Quebec government to fund the Route Verte, one of the largest cycling networks in America. The result: the 2016 budget includes \$50 million over 10 years for the Route Verte. Hooray for cycling!

Finally, Équiterre was one of the main organizations that contributed to the adoption of a Canadian climate plan by the federal and provincial governments. While not perfect, this plan is unprecedented in its scope and marks a huge first step towards meeting Canada's commitments under the Paris Agreement.

Here's to even more victories in 2017!

   Humberto Pinochet

H  l  ne Dufresne

Chair of the Board of Directors

Message from the Chair of the Board

In 2016,   quiterre successfully completed a strategic reflection that was a logical and essential step given the Paris Agreement, the arrival of new governments in Ottawa and Alberta, and the impressive growth in   quiterre's membership (from 9,000 members on December 31, 2013, to 20,000 members as of December 31, 2016).

With the aim of broadening the discussion, we polled our members and followers, questioned our partners, consulted our volunteers and solicited the participation of our employees.

The outcome of this exercise in research, analysis, dialogue, debate and discussion is our new strategic plan for 2017-2020. This plan sets out the objectives that   quiterre intends to pursue over this period as well as the master strategy it will put in place to do so.

We will continue to focus our efforts on two main issues: reducing greenhouse gas emissions and limiting the use of pesticides and toxic substances. However, we have also added new issues to our list, including the planned obsolescence of consumer products, environmental education and issues related to meat consumption.

We look forward to addressing these challenges with the loyal support of our growing citizens' movement.

Methodological approach used to develop our new strategic plan

Fall 2015
The Board of Directors appointed a Strategic Planning Committee that met seven times in 2016 to guide the process.

Winter 2015
Interviews were conducted with numerous experts and partners on these same issues.

May 2016
Managers and project leaders proposed broad strategic directions.

August 2016
Board members and project leaders convened to discuss objectives.

November 30, 2016
The Board adopted the Strategic Plan for 2017–2020.

Fall 2015
Employees, interns and volunteers were surveyed on strengths, weaknesses, opportunities and threats, as well as on priorities for the coming years.

February 2016
A two-day meeting was held for employees, board members and volunteers.

June 2016
The first draft of the organization's mission, vision, values and strategic directions was adopted by the Board.

September 2016
Employees met to discuss objectives.

Mission

Équiterre offers **concrete solutions** to accelerate the **transition** towards a society in which individuals, organizations and governments make **ecological choices** that are both **healthy** and **equitable**.

Vision

By **2030**, Équiterre, in partnership with local communities, will have contributed to the development of **public policies** as well as **civic** and **business** practices that lead to a **low-carbon economy** and an **environment free of toxic substances**.

Members of Équiterre Board of Directors

Thanks to their commitment and personal, professional and social values, our Board members play an important role in promoting the mission and values of Équiterre. Their capacity for innovation, their intellectual and professional rigour, and their complementary expertise offer new and relevant perspectives on our actions and actively contribute to the success of our current and future projects.

We are extremely grateful to all our Board members for their dedication to Équiterre and the environmental cause.

A **citizen's movement** that keeps on growing: **20,000 members!**

Thousands of individual citizens chose to take their support of our actions one step further this year. We're very proud of them and grateful for their commitment!

Our annual members' meetings held in April in Quebec City and Montreal broke attendance records this year.

THANK YOU 20,000 times to all the engaged citizens who are helping us change the world, one step at a time!

Organizational **development**

This was a year of expansion for our organization, as we opened an office in Ottawa, enabling us to exert greater influence on the federal government's public policies. We have welcomed in our team experts in government relations and toxic substances.

We also made improvements to our human resources policies to facilitate a better work-life balance and support our employees throughout their career path.

Celebrating 20 years with 20 recipes

Twenty personalities helped us celebrate the 20th anniversary of our family farmer network by concocting a special recipe inspired by the contents of an organic basket.

Florence K, Christian Bégin, Nana Marmelade, Ian Kelly, Josée Di Stasio, Philippe Mollé, Laure Waridel, Bob le Chef, Marilou, Josée Blanchette, Vincent Lafleur, Fanny Bloom, Karim Ouellet, Nakuset, Jérôme Ferrer, Sophie Cadieux, Emmanuel Bilodeau, Christine Beaulieu, Steven Guilbeault, Chantal Fontaine

To your good health!

Subscribe to Équiterre's family farmers
organic baskets

équiterre

Over 52,000 citizens signed up to receive weekly baskets of fresh, organic vegetables and produce grown sustainably by 122 family farmers across Quebec.

The Bio Locaux

The Bio Locaux group of organic farmers joined our network of family farmers, adding to the diversity of organic basket offerings with a selection of grains, flours, oils, bread and other delicious local organic products!

“Des idées à récolter”

To cap off this 20th anniversary in style, over 200 producers, agri-food stakeholders, decision-makers, emerging farmers and agri-food researchers came together to share ideas and inspiration on the theme of short food supply chains at the “Des idées à récolter” conference.

Even **more local food** in our **institutions!**

Équiterre has several ongoing projects aimed at increasing the amount of local food offered in institutions across Quebec.

Thanks to the Croqu'Plaisir project, more than 5,500 children in daycare centres in Montérégie now have access to menus consisting mainly of local food.

The Schools Take Root project offers schools an original and local way to raise funds for their projects by proposing baskets of organic fruits and vegetables (instead of chocolate) grown by our local family farmers.

In collaboration with Farm to Cafeteria Canada, Équiterre created a map of initiatives aimed at promoting healthy, local and sustainable food in the country's schools.

Équiterre and Aliments du Québec launched a pilot project for a new certification program targeting institutions: "Aliments du Québec au menu – Volet institutionnel." Over 26 institutions across the province (healthcare establishments, daycares, primary and secondary schools, higher education institutions, companies and public institutions) that together serve over 15,000 meals each day made the choice to procure their food locally!

Pesticide control

We made great strides in our fight to reduce pesticide use.

In a major victory, the Federal Court issued a ruling forcing the Canadian government to conduct a special review of over 350 pesticides containing active ingredients that are banned in Europe. Our efforts are paying off:

The MDDELCC will table a draft bill to amend the Pesticides Act by increasing restrictions on the use of dangerous pesticides such as neonicotinoids and atrazine.

A successful campaign promoting the petition to ban atrazine, a harmful pesticide widely used in Canada that is currently being reviewed by Health Canada.

Fighting climate change

Thanks to our determination and hard work, we made progress on several fronts this year in our fight against climate change.

Équiterre and its partners took TransCanada to court to force the company to comply with Quebec's environmental protection legislation, which it was attempting to bypass.

Équiterre, community groups and many other organizations called on the National Energy Board to suspend its hearings on the Energy East pipeline project.

Équiterre joined forces with two major Canadian environmental groups, the Pembina Institute and Environmental Defence, to carry out joint actions and to pressure Canada to adopt an ambitious climate plan.

Équiterre called on the federal government to implement an evidence-based "climate test" in its environmental review process.

COP22 in Marrakesh: Équiterre was on hand to represent your demands regarding environmental and climate protection.

The Paris Agreement came into effect, obtaining the signatures of 115 countries in one year! Équiterre marked this historic event by handing out croissants to passers-by.

Electrification of transportation

In a first for Quebec, the “My City – 100% Electric” event held in downtown Montreal featured an exhibition showcasing the entire range of existing modes of electric transportation.

Actress Christine Beaulieu, the dynamic spokesperson for Rendez-vous branchés, took on the challenge of making the 2,080-km trip from Montreal to Havre-St-Pierre in an electric car!

Over 500 participants conducted 800 test drives of electric vehicles during the popular Rendez-vous branchés event, with stops in Joliette, Longueuil, Portneuf and Plessisville. And the good news is that 93% of participants are planning to purchase an electric vehicle within the next 5 years!

Bill 104: Équiterre successfully called on the Quebec National Assembly to adopt “zero-emission” legislation!

The **Centre for Sustainable Development** celebrates its **5th anniversary!**

To mark the occasion, we organized a series of talks and publications on green buildings, inspired by the adventure of the Centre for Sustainable Development, a project spearheaded by Équiterre. This exemplary demonstration building, which has LEED® Platinum certification in the New Construction (NC) category, remains one of the greenest buildings in Canada.

A first conference to take stock of the impact of the building's materials was held and 1,300 people took part in 144 guided tours of the Centre.

Citizen **Mobilization**

Energetic and engaged volunteer action groups

Our 4 action groups (Lanaudière, Montreal, Outaouais and Quebec City), comprising over 50 active volunteers, held several events combining pleasure and environmental awareness.

- Bike blender booth
- Tabling of petitions in the National Assembly
- Organization of talks and free-trade wine and chocolate evenings
- Weed clean-up on a farm
- Participation in fairs
- Documentary screenings
- And much more!

Thank you to all these engaged citizens, of all ages and backgrounds!

Petitions...

- Demanding that Health Canada ban atrazine, one of the most dangerous pesticides;
- Calling for the elimination of billions of dollars in subsidies for fossil fuels;
- To Save Our Route Verte: this petition, with 48,000 signatures, was presented to 13 MNAs, thus ensuring the future of this precious 5,300-km cycling network, which passes through nearly 400 municipalities in 16 regions and 94 RCMs across Quebec;
- To protect our freedom of expression by modernizing the vague and outdated law on charities and their political activities

Quebec says NO to Energy East

Thanks to our work in the field and the efforts of elected officials and citizens, 300 municipalities came out against the Energy East pipeline project in Quebec.

Équiterre at the World Social Forum

Over 250 people from all over the world took part in the activities organized by Équiterre and its partners promoting fair trade, sustainable mobility, ethical fashion, etc.

Innovative and eco-friendly fundraising

The “Change the World with Équiterre” run

Over 400 people took part in the 1st edition of this 100% eco-friendly run, raising \$25,000 to support our projects!

Benefit cocktails in Montreal and Quebec City

This year, Équiterre pushed the envelope with its eco-friendly practices at this annual event that attracted over 700 guests, while promoting the theme of renewal energy. This event also received the Vivat award in the food category in 2016 for its environmentally friendly practices during the 2015 edition.

Online auction

Thanks to the generosity of our partners and participants, our 3rd online auction raised \$10,668.

Our thanks to all those who showed their solidarity and helped make our world more ecological and equitable by participating in our various activities.

Laure Waridel **Bursery**

Valérie Toupin-Dubé, our 8th recipient of the Laure Waridel Bursary, developed the “École-O-Champ” (Farm to School) educational toolkit to raise awareness about sustainable farming and food in our schools.

Thanks to the \$10,000 bursary awarded by Équiterre and the Caisse d'économie solidaire Desjardins, Valérie and her team were able to:

- Standardize and translate educational modules in agricultural, food and environmental sciences for primary schools and cycle one of high school;
- Develop 3 educational toolkits that encourage schools to get to know their agricultural and environmental resources, to promote local food purchasing (family farmers) and to teach educational modules in the classroom to grade students in science;
- Develop the mission, logo and website for the École-O-Champ project;
- Design a new program (Ag-Leadership) for the École-O-Champ 2016 summer camp;
- Organize a contest.

Congratulations to our talented and dynamic bursary winner!

Publications and reports

Équiterre continues its work in the areas of research, education and information by producing numerous briefs, reports and fact sheets on a range of issues.

- **Drinking water:** The Energy East pipeline poses a threat to the drinking water of more than 5 million Canadians.
- **Fair trade:** Study on the positive impact of fair trade on communities in the Southern hemisphere and the main obstacles.
- Recommendations for the elimination of **fossil fuel subsidies**.
- Briefs on bills 104 and 106 on **zero-emission vehicles and the implementation of the 2030 Energy Policy**.
- Debunking of myths about **renewable energies**.
- Background documents on **neonicotinoid, pyrethroid and glyphosate pesticides**.
- Price watch on **organic fruits and vegetables**.
- *Report: The Sky's Limit: Why the Paris Climate Goals Require a Managed Decline of Fossil Fuel Production.*
